

Hostert Pro RD - Roll up and/or Take off Unit

Makes working with large media rolls easy:

- Process complete large-sized rolls up to 60 cm diameter in one piece (jumbo-sized available upon request).
- Use the Hostert RD to bring the complete roll from one work station to the next.
- Standard heights allow fast and easy roll up and take off.
- The Dandy roller directs the drive motor and guarantees a constant and steady paper tension.
- Simple change-over between the 2 functions: roll up or take off.
- Pullback security: automatic stop when the material at the end of the roll is attached to the core.

Details:

- roll for 3", 5" or 6" with pneumatically attached core.
- custom diameter sizes available upon request.
- Side rollers ensure perfect and straight tracking at the roll up point.
- Solid and strong take-up and transport.

Dandy roller with parallel control

- Controls drive motor.
- Ensures constant tension on material.
- No imbalance, even with small rolls, loaded centrally or sideways.

Variable and Fixed Models

Variable

RD1 Adjustable for roll widths from 2-3,5m
Closed L 260,50cm - open 430cm x B 75cm x H 65,60cm
